EXPERIENCE

Forschungsgruppe Verkehrstelematik

Research Assistant — *2025 - Ongoing, Saarbrücken*

Data Science and Research Analytics

- Analyzing research and transportation-related data to support FGVT projects and evidence-based decision-making.
- Preparing, cleaning, and structuring datasets for statistical analysis and machine learning workflows.
- Developing data visualizations and analytical reports to communicate insights clearly to research partners.

Moltomedia GmbH

Werkstudent — *2025 - 2026, Saarbrücken*

Full-Stack Web Application Development

- Collaborated with product managers and developers to build responsive web applications aligned with user and business requirements.
- Developed reusable frontend components, integrated REST APIs, and implemented backend functionality for interactive user workflows.

Application Architecture and Engineering

- Contributed to scalable application architecture by connecting frontend interfaces with backend services and structured data.
- Documented API integrations, reusable components, and implementation guidelines to improve maintainability and collaboration across engineering teams.

Zephyr Technologies

Front End Developer — *2023 - 2024, India*

Full-Stack Development for Client Projects

- Developed and maintained full-stack web applications using JavaScript, React, REST APIs, and backend services.
- Implemented frontend interfaces, server-side functionality, and database integrations for client requirements.
- Optimized applications for performance, accessibility, security, and cross-browser compatibility.

EDUCATION

University of Saarland

Masters in Data Science and AI — *2024 - Ongoing, Germany*

Visvesvaraya Technological University

Bachelors in Computer Science — *2019 - 2023, India*

CGPA: 1.4 (Converted to German Grade)

SUMMARY

Data Science and Full-Stack Developer with experience building responsive web applications and developing data-driven solutions. Proficient in Python, SQL, JavaScript, React, REST APIs, data analysis, machine learning fundamentals, and full-stack web development.

SKILLS

Frontend	React, Vue.js, Responsive UI
Backend	REST APIs, Node.js
Databases	PostgreSQL, MySQL, Data Modeling
Data Science	Data Analysis, Data Cleaning, Data Visualization

VOLUNTEERING

ESN Estonia

Communication Manager — *2026 - 2026, Estonia*

Google Developer Student Club

Web Lead — *2021 - 2023, India*

PROJECTS

depower

Built a LightGBM model that forecasts 24 hourly German electricity prices before the day-ahead auction and publishes its forecast errors.

APEX F1 Analytics

Built a React and Node.js dashboard using OpenF1 data for lap-by-lap race analysis, driver telemetry comparisons, tire strategy charts, and AI-assisted race analysis.

WORKSHOPS (ERASMUS)

Web Development Workshop
St. Etienne, France

GreenTech Data Challenge
Tallinn, Estonia
